

At the August 8, 2023 regular meeting the Field Town Board met with representatives from Paul Bunyan Communications, IRRR, and ST. Louis County to discuss installation of fiber optic broadband hardlines for the township area. Paul Bunyan will be looking at properties to determine population density along the proposed route. This information will determine the plan going forward. There are state, county and IRRR grant funds available for broadband projects.

The town board will be discussing the project further at the regular board meeting September 12, 7 p.m. at the town hall.

Public comments are welcome on the township website or the Paul Bunyan Communications Facebook page where there will also be updates on the project.
